

Dear Health Care professional

We would like to thank you for ordering and dispensing our unique ThermoActive Plus line of products for your patient's.

As you know, our ThermoActive Plus line of supports are only sold to and dispensed by Health Care Professionals. All of the ThermoActive Plus Orthosis have the following requirements for success.

- Choice of the professional joint kit that is most appropriate
- Must be set for the specific patient's requirements – as presented (this may change as the patient's condition changes)
- Joint Kits must be bent or modified to for the proper fit and function

All ThermoActive Plus products have been sent to CMS for HCPCS coding so that the appropriate professionals may submit for reimbursement for their efforts. Below is an example:

Re: Assigned Healthcare Common Procedural Coding System (HCPCS) Codes

Xref #: 14831939

Mfg/Product: Polygel / ThermoActive Range of Motion Knee System

Model number: 6022 ROM SYS

Dear Ms. Hutter:

It is our determination that the Medicare HCPCS codes to use to bill the four Durable Medical Equipment Medicare Administrative Contractors (DME MACs) for the product listed above are:

L1832 - KNEE ORTHOSIS, ADJUSTABLE KNEE JOINTS (UNICENTRIC OR POLYCENTRIC), POSITIONAL ORTHOSIS, RIGID SUPPORT, PREFABRICATED, INCLUDES FITTING AND ADJUSTMENT

A9273 - HOT WATER BOTTLE, ICE CAP OR COLLAR, HEAT AND/OR COLD WRAP, ANY TYPE

This decision applies to the application that we received on May 5, 2011. If information submitted in that application has changed or were to change, it could impact our decision. Therefore, a new application would need to be submitted for HCPCS coding verification review. This coding decision will be available within ten (10) working days on the Durable Medical Equipment Coding System (DMECS), which is located on the PDAC web site, www.dmeptac.com. Please take the time to verify that this coding decision is correctly reflected in DMECS.

Basic ThermoActive Knee

Professional Range Of Motion joint kit with velcro attachment 'pods'. Must be set to correct flexion and extension

Joints are attached in different positions for each patient and may have to be changed as necessary for ideal results

Joints are set, shape modified for ideal fit and compression added as deemed by professional experience

Polygel has been granted HCPCS codes for ThermoActive Plus Orthosis with 'joint kits' for our Wrist, 2 types of knee's, 2 types of elbows and our Lumbar Back Orthosis. All of these are only sold to Health Care Professionals.

Please note that ThermoActive and products that look like it may be purchased in the 'consumer' version on line - but NO ThermoActive Plus Professional product (with functional supports) are available.

All professionals are paid for their time and expertise in treating their patient's with the best device and care within their means. It is important that you point this out to you patient's. Self medicating devices cannot compare to those prescribed, fit and dispensed by you.

Please call, write or email if you require additional information on our growing line of products.
